REFERENCE

TO : Larry Bumbicka - 1740

We would like the plant's permission to locate an office trailer in the area south of the ACL cooling tower. This trailer will be used by the Alberici field staff consisting of their project manager (part-time on site), project engineer, job superintendent, selected craft foremen, and secretary.

Since we have selected a contract strategy of T&M with a guaranteed maximum price, the documentation required will be quite extensive. All such documentation will be done in the field. The contractor will have in his trailer office equipment such as a copying machine, typewriters, calculators, etc.

The present schedule indicates that the trailer will be in the field about 24 months. Please inform me of the plant's decision at your earliest convenience.

If you have any questions please call.
